Family Naming Patterns

Some Exceptions

- ◆ When a child died, it was common to give the next child of the same gender the same name.
- ◆ When a mother died during childbirth or a father during a pregnancy, it was common to name that child after their parent of the same gender.
- ◆ When a wife or husband died, it was common to give the first child of the same gender from the next spouse, the given name and surname of the departed spouse.
- ◆ Instead of naming a child after an eldest brother or sister, the name of a favorite brother or sister or friend might be used.
- ◆ If a name was already used, e.g. if the father was named after his father, his middle name might be used for his son; or that rule might be skipped.

Early Colonial American Naming Notes (Variable)

Children	Named After
◆ 1 st son	father [yellow highlighting means same as 1 st slide - none]
◆ 2 nd son	father's oldest brother + mother's or maternal grandmother's maiden name*
◆ 1 st dau	mother's mother*
◆ 2 nd dau	mother's oldest sister

- younger sons were often given maiden name of a paternal grandmother as a middle or even a first name.
- as more children were born, more maiden names were used, but generally only those in the direct ancestral line.

* add middle name of 2nd son to 1st name of eldest dau to get maternal grandmother
